# How to edit pledges in CRIC:

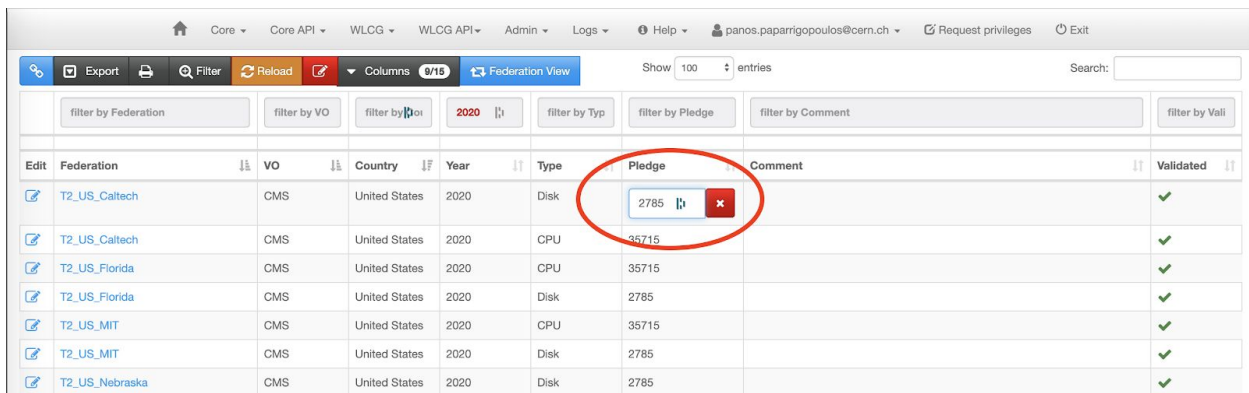

You need to be logged in and have the necessary permissions to edit the pledges of your Federation.

In order to get the permissions see the “How to request permissions in CRIC” permissions section.

Visiting <https://wlcg-cric.cern.ch/core/pledge/list/> you can see all the pledges.

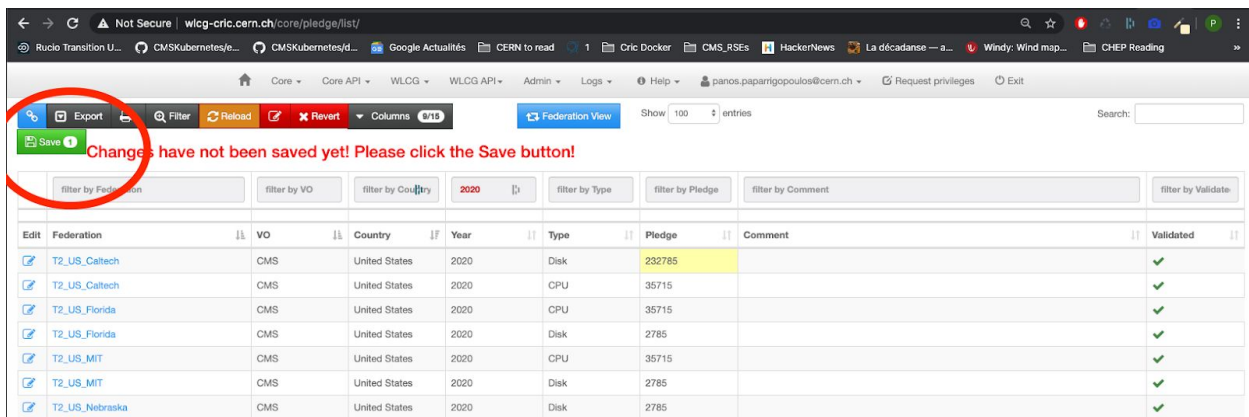

If a pledge is not validated you can edit it with two different ways:

1. Clicking the edit button on the left side of the table will redirect you to the pledge editing interface where you can change all the details of a non-validated pledge.
2. Directly from the table view:
  - a. Clicking on the current pledge number the field will become editable

## How to login in CRIC:

In order to login in CRIC you need a valid CERN account.

Clicking in the 'Login' text at the header of CRIC will redirect you to the login page where you will find the 'Sign in with CERN SSO' option.

In case you don't have a CERN account you will need a local CRIC account. Please contact the CRIC admins with a mail at [cric-devs@cern.ch](mailto:cric-devs@cern.ch) and they will create an account for you.

## How to request permissions in CRIC:

After logging in the system you will need specific permissions to edit information.

Clicking in the "Request privileges" button at the CRIC header will redirect you to the permission request wizard. There you can select your site or federation in the corresponding steps and after one of the CRIC admins approves your request you should be able to edit all the information attached to your federation or site.
